WHAT IS THE COMMUNICATION YEARBOOK?

Over the past quarter of a century the study of communication has emerged as one of the fastest growing, most topically diverse, richly multidisciplinary and international in scope of scholarly enterprises. Each year witnesses a vast increase in the number of reported new research techniques, methodologies, perspectives, findings and controversies.

ICA has undertaken publication of a series of annual volumes affording scholars easy access to reviews, syntheses and critiques of developments in key substantive areas of communication theory and research.

Review and commentary articles provide critical and informative syntheses in areas of generic relevance to all communication scholars no matter what their particular specialization.

Theory and Research overviews provide opportunities for reviewing current trends in the diverse substantive domains within communication, sometimes updating and integrating theory and research in an entire area or at others reviewing developments in a subarea of particular importance.

Selected studies are edited versions of reports of current research that have been competitively chosen for special recognition at the annual conference of ICA.

This publication is available to ICA members through ICA Headquarters. It's available to bookstores through Transaction, Inc., Rutgers University.

To order, write ICA YEARBOOK, ICA, Balcones Research Center, 10,100 Burnet Road, Austin, TX 78758, or call, ICA, AC 512, 836-0440, ext. 3061.
